#### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the Application:

1. (Currently Amended) A convolutely wound web material dispensing kit comprising a package, the package comprising:  
at least one roll of the convolutely wound web material,  
at least one roll-support adapter capable of supporting the roll of convolutely wound web material and capable of interfacing with a roll-holding fixture having a first single roll capacity, and,  
wherein the combination of the roll-support adapter and the roll holding fixture has a single roll capacity greater than the first single roll capacity, and  
wherein the at least one roll-support adapter is disposed in a cleft area between the at least one roll of convolutedly wound web material.
2. (Original) A kit according to claim 1 comprising a plurality of rolls of a convolutely wound web material.
3. (Original) A kit according to claim 1 wherein the wound web material comprises a width and spaced apart lines of weakness generally transverse to the width.
4. (Original) A kit according to claim 1 wherein the web material comprises a paper material.
5. (Original) The kit according to claim 1 wherein the roll and the roll-support adapter are provided in a single package.
6. (Original) The kit according to claim 5 wherein the roll comprises a hollow core and the roll-support adapter is disposed within the hollow core.

7. (Withdrawn) The kit according to claim 5 wherein the roll-support adapter comprises a carrying handle for the package.
8. (Original) The kit according to claim 1 wherein the roll-support adapter is disposed within an adapter container.
9. (Original) The kit according to claim 8 wherein the adapter container is disposed within the core of the roll.
10. (Original) The kit according to claim 1 wherein at least one kit component comprises an indicia.
11. (Previously Presented) A kit comprising a package, the package comprising:  
at least one roll of convolutely wound web material,  
at least one roll-support adapter capable of supporting the roll and capable of interfacing with a roll-holding fixture having a first single roll capacity,  
wherein the combination of the roll-support adapter and the roll holding fixture has a single roll capacity greater than the first single roll capacity,  
an adapter container, and  
wherein at least one component of the kit comprises an indicia.
12. (Withdrawn) A method of marketing convolutely wound web materials, the method comprising steps of:
  - a) providing at least one roll of convolutely wound web material,
  - b) providing at least one roll-support adapter capable of interfacing with an existing roll-holding fixture having a first single roll capacity and capable of supporting the roll of convolutely wound web material, wherein the combination of the roll-support adapter and the roll holding fixture has a single roll capacity greater than the first single roll capacity, and
  - c) providing the roll and the roll-support adapter as components of a kit.

providing a means whereby the first package and the second package may be acquired at the cost of either the first package or the cost of the second package.

21. (New) A convolutely wound web material dispensing kit comprising a package, the package comprising:  
at least one roll of the convolutely wound web material,  
at least one roll-support adapter capable of supporting the roll of convolutely wound web material and capable of interfacing with a roll-holding fixture having a first single roll capacity,  
wherein the combination of the roll-support adapter and the roll holding fixture has a single roll capacity greater than the first single roll capacity, and  
wherein the at least one roll-support adapter is incorporated into the package as a carrying handle for the package.
22. (New) A convolutely wound web material dispensing kit comprising a package, the package comprising:  
at least one roll of the convolutely wound web material,  
at least one roll-support adapter capable of supporting the roll of convolutely wound web material and capable of interfacing with a roll-holding fixture having a first single roll capacity,  
wherein the combination of the roll-support adapter and the roll holding fixture has a single roll capacity greater than the first single roll capacity, and  
wherein the at least one roll-support adapter is provided in an adapter container, and wherein the adapter container is unitized by over-wrapping the adapter container and the package.
23. (New) A convolutely wound web material dispensing kit comprising a package, the package comprising:  
at least one roll of the convolutely wound web material,
